ECAT Computer Science Chapter 12 Introduction to C Language

Sr	Questions	Answers Choice
1	Which of the following is incorrect?	A. A function can call another function B. A function can be calling many times in a program C. A function can return values input by user D. A function must have at least one value parameter
2	Function prototype for built-in functions are specified in:	A. Source file B. Header file C. Object file D. Image file
3	Which of the following steps takes place when function is called:	A. The control moves to the function that is called B. All statements in the body of function are executed C. The control returns back to the calling function D. All of these
4	Which of the following can return a value	A. Function B. Procedure C. Both A and B D. None of above
5	Which of the following Is NOT a valid function declaration?	A. Int ave3(int a, Int b, Int c); B. Int 3ave(Int a, Int b, Int c); C. int ave3(int, int, int); D. int ave_3(int al, int a2, Int a3)
6	Which statement is used by a function used to return a value:	A. Given B. Return C. Continue D. Send
7	The statement that activates a function is known as:	A. Function call B. Function output C. Function design D. Function definition
8	Which of the following is type of function available in C language?	A. User-defined B. Arithmetic function C. Both a and b D. Library function
9	Function declaration consists of	A. Function name B. Function return type C. Number and types of parameters D. All of these
10	A variable declaration outside any function is known as:	A. Global variable B. Local variable C. External variable D. Static variable
11	A value that can be sent to a function is known as	A. Returned value B. Indicator C. Argument D. Automatic variables
12	Global variables are created In	A. RAM B. ROM C. Hard disk D. Cache
13	Function definition can be written	A. Before main() function B. After main() function C. In a separate file D. All of these
14	The function definition consists of:	A. Function header of function declaration B. Function body

		C. Both A and B D. None of these
15	The name of actual and formal parameters:	A. May or may not be same B. Must be same C. Must be different D. Must be in lower case
16	The parameters in function declaration is called:	A. Returned parameters B. Both A and B C. Actual parameters D. Formal parameters
17	A built-in function:	A. Cannot be redefined B. Can be redefined C. Cannot return a value D. Should be redefined
18	The first line of function definition is known as:	A. Function header B. Function body C. Arguments D. Return type
19	Formal arguments are also called	A. Actual arguments B. Dummy arguments C. Original arguments D. Referenced arguments
20	Function prototype for built-in functions are specified In	A. Source file B. Header file C. Object file D. Image file
