PPSC Computer Science Topic 8 C Programming

Sr	Questions	Answers Choice
1	The storage class of a local variable is	A. Auto B. Static C. Extern D. Register
2	The function fprint is used in the program.	A. When too + many print calls have been used in the program. B. In place of printf , as it uses more memory C. When the type of the variables to be printed are not known D. When the output is to be printed on to a file
3	In mixed mode expressions.	A. Operands of lower type get automatically converted to higher type B. Operands of higher type get automatically converted to lower type. C. Operands of higher and lower type get in there changed D. Operands of lower type get automatically converted to lower type.
4	A function with no definition	A. I san invalid function B. Produces syntax error C. Result into runtime error D. Is allowed and is known as dummy function
5	A function protoype is	A. A definition of the function B. a declaration statement in the called program C. A declaration statement in the called program D. A function call in the program
6	Every C program consists of _____ functions.	A. Only one B. Only two C. One or many D. None of the above
7	Array are passed as the arguments to a function by	A. Value B. Reference C. Constant value D. Both a and b
8	The size of an int must be greater than or equal to that of a	A. Long int B. Short int C. Float D. Char
9	Which operator from the following has the lowest priority.	A. Assignment operator B. Division operator C. Common operator D. Conditional operator
10	To most widely used method for interpreting the bit setting as non negative integer is.	A. EBCD system B. BCD system C. ASCII system D. Binary number system
11	The getchar ()function reads a	A. String from a file B. Character from a file C. String from the key board D. Character from the keyboard
12	int *p[5] ; is used for	A. Fixed row size and varying column size B. Fixed row size and fixed column size C. Varying row size and varying column size.

		D. For storing integers
13	How would you declared constant of 5 called 'MYCONST"?	A. Constant MYCONST =5 B. Int my const =5 C. # define MYCONST 5 D. #define MYCONST =5
14	How many union members can be initialized.	A. Only one member of union at any one time. B. Any number of members of a union at one time C. Union members can not be initialized D. Only two members of a union at any one time.
15	The function slower checks wither a character is in lowered case or not and hence it should return.	A. The character in lower case B. The character itself C. Nothing D. 0 or 1
16	The given statement FILE "fptr;	A. Defines a pointer to the pre defined structure type FILE. B. Defines a pointer to the usere defined structure type FILE C. Defines a pointer to the pre-defined data type FILE DESCRIPTOR. D. Creates a file pointed by fptr
17	The arguments in main () function are known as.	A. Program parameter B. Command line arguments C. Both a and b above D. None of these
18	C program language vas developed by.	A. Dennis Ritchie B. Ken thompson C. Bill Gates D. Peter Norton
19	The function sprint ( ) works like print f ( ) , but operates on.	A. Strings B. Data in a file C. Stderr D. Stdin
20	Which of the following is an advantage of using macros over functions.	A. Functions must have parameters, macros do not B. The code associated with a function is expanded in line C. Values passed to function must be of specific data type D. The code associated with a function is not expanded in line.
